## **RoSPA accreditation of Human Focus November 2008**

RoSPA has a formal agreement in place to accredit the Human Focus web-based health and safety management system along with the associated certification process. This arrangement permits the display of the RoSPA logo by Human Focus to recognize this accreditation

### **What is RoSPA accrediting in the Human Focus system?**

RoSPA accredits two aspects of Human Focus - these are:

1. The technical content of Human Focus health and safety training programmes
2. The technical content of the organisation level certification process provided by Human Focus

### **Terms and conditions of this accreditation**

1. Human Focus is responsible for all aspects of the delivery of its training and certification processes. Participating organisations are certified by Human Focus and not RoSPA. This accreditation confirms that the technical content of these processes and training programmes are approved by RoSPA.
2. The provision of RoSPA accreditation via Human Focus services does not imply that individuals, or organisations, have all necessary training and other arrangements required to work safely. Final verification of acceptable safety standards ultimately remains the responsibility of the employer and other relevant stake-holders.

*Leading the way in safety*
